Photoshop
Front-end developer
Web development

"I am a dedicated front-end web developer with a passion for creating captivating user experiences. I specialize in combining design principles with programming languages to craft visually stunning and highly functional websites. I strive to deliver exceptional results. Feel free to explore and discover more about my work and qualifications."

EXPERIENCE

- KalaSudha :
  Front-end Web Developer:
    Worked on a website that sells tickets for offline events.
    Utilized HTML and Tailwind CSS to create a dynamic list of events with different types.
    Designed buttons with engaging hover effects to enhance interactivity.
    Implemented a footer section to provide additional information and navigation.
    Leveraged JavaScript to add interactive hover effects and improve user experience.

- Developed a personal **resume website** using HTML, CSS, TailwindCSS, and JavaScript.
- Hosted the website on GitHub, providing easy access to the project repository.
  (https://anshumangarg120.github.io/Anshuman/index.html)

- Figma Experience:
    Worked on various design projects using Figma.
    Created UI designs, prototypes, and collaborated with team members.
    Proficient in utilizing Figma's features for efficient design workflows.

- I have experience testing website components like forms, logos, footers, and contact links using Nightwatch.js. Here is an example of how I have written test code for these components in Nightwatch.js:
    - Tested form functionality by entering valid data and verifying successful form submission.
    - Ensured the visibility of the logo element on the website.
    - Verified the functionality of footer links by clicking and navigating to the respective pages.
